

Elevators

FSI has partnered with modernized and professional elevator manufacturer which integrates the design, development, manufacturing, sales, installation, and maintenance. We have A-Level qualification certificate, issued by general administration of quality supervision, inspection, and quarantine, for elevator manufacturing, installation, modernization, and maintenance. We also have European CE Certification, Korean KC Certification, Russian EAC Certification and German TUV Certification.

Research & Development

With strong R&D and innovation strength, we have constantly developed new products and technologies leading the market trend.

Our partner has constructed an elevator test tower with the total height of 288m and the ground clear height of 268m. It extends to the underground with the depth of 20m. Besides, it has 9 testing shafts, 1 sightseeing shaft and 2 high-rise panoramic platforms. It applies the design integrating testing and sightseeing.

To improve the quality of the experiment and enhance the level of test, we have built first-class facilities laboratory, to carry out all kinds of functional testing for elevator subsystems and components, component's reliability test, environment test, electromagnetic compatibility test, metallographic test, and failure analysis, etc. All tests are powerfully boost on design verification, parts selection, new product cognizance, production parts approval process and supplier parts quality reliability testing, etc.

Manufacturing

Advanced equipment is the premise and edge tool for the high standard of product quality. By introducing various world first-class modern manufacturing technologies and through accurate operation, we have reached high-standard manufacture level and mastered the corresponding advantages. Currently, we have established perfect large-scale workshop equipment in electrical-controlled workshops and electronic workshops, which provides important support and guarantees for the rapid development. The company furnished a huge amount of money for the purchase of two Italian SALVAGNINI Flexible Production Lines, which helps to form the supreme and efficient production system within the industry, substantially improves the production effectiveness, and uplifts the company's production capacity to an unprecedented height.

Guaranteeing the Accuracy of Every Component

We have boasted the world-class manufacturing skills and advanced production management. In strict accordance with the international production standard, it realizes the good interaction between people and technologies & equipment and improves the ability of lean production and flexible manufacture. By humanized design process and strict precision production standard, it has manufactured more perfect and high-quality products whose quality has reached the purchasing standards of many countries and regions all over the world.

Elevator

KLK2 High Speed Elevator

Efficient/Intelligent/Safe

KLK1 Passenger Elevator

Leading in technology with brilliant intelligence

KLJ Home Use Elevator

Open the era of elevator home appliance

KLH/KLQ/KLW/KLZW Freight Elevator

Holding self-discipline and social commitment, undertaking heavy responsibilities and important tasks.

KLB/KLQ Hospital Elevator

Bearing life and fulfilling mission

KLW Machine roomless Elevator

Released space and infinite innovation

KLK1 Passenger Elevator

Being people oriented starting from the heart.

KLG/KLWG Panaroma Elevator

Scenery is wherever, your vision goes

Escalator

KLXF Heavy-duty Public Traffic Type Escalator

Efficient/Intelligent/Safe

KLF Jinshow Escalator

Leading in technology with brilliant intelligence

KLF Lingshow Escalator

Quality, Technology, Humanity

KLM Lingshow Escalator

Efficient/Intelligent/Safe

KLT Public Traffic Type Escalator

Remarkable performance, Excellent transportation.

Moving Walk

KRF/KLRP Moving Walk

Large width, high flow.
